Make an E-commerce Website for Sporty Shoes .

In this project, an ecommerce website of selling sport shoes will be produce at the end of this project. This project reduces lot of work load for customer. The main of this project helps in browsing products and able to add their desired items into shopping cart. Customer can choose different sport shoes based on gender, price range, colors and sizes. This system helps to choose products faster and easier at on place. An online store is a virtual store on the internet where users can browse the catalog and select products of interest such as the flavour color of the sport shoes. The selected items may be collected in a shopping cart. At checkout time, the items in the shopping cart will be displayed as an order.

Features includes:
1. Login and Registration
2. Search and browse items
3. Add to cart
4. Manage shopping cart
5. Checkout
6. Payment
7. Update customer/product info
